

THE VOICE BUSINESS
SPEAK WITH CONFIDENCE

News Reading (MNR)

Great for people...who want to develop or upgrade their news reading skills.

Purpose:

This course is designed to give you an overall understanding of how to read the news. The course is conducted in a one-to-one format over a three session period. During the course you will learn how to use your voice skilfully to deliver a variety of emotional “reads” for radio and TV (including serious, happy, light, informative, instructional angles), to develop the ability to “sight-read”, turning written words into “spoken” English and to conduct yourself confidently and professionally in a news recording session. TV playback will give you an opportunity to see yourself in action and to fine-tune your performance. Autocue reading techniques are practiced but can be dealt with in depth in a separate course if and when required.

© Voice Business 2024

What you will learn:

- How to improve the sound of your voice and speak with confidence.
- How to "sight-read" effortlessly.
- How to shift emotional gear between news stories.
- How to sound convincing, authoritative and persuasive
- Breathing techniques to help you keep cool when the pressure “hots up”.
- Learn how to speed up or slow down, and how to use inflections and pauses to make what you say more interesting.
- How to improve your diction and pronunciation.
- How to deliver a clear message and get the results you want.
